•• Indicates fastbreaking teams. These teams run the fastbreak offense at every opportunity.

• Indicates teams that run a patterned offense. These teams use the fastbreak only about a third of all possible opportunities.

All other teams fastbreak about two thirds of all possible opportunities. All teams will perform realistically when the suggested offenses are used accordingly. It should be noted that a fastbreak offense incurs more turnovers. Therefore, it should seldom be used when holding a lead late in the game.

For realistic results, Campy Russell of the New York Knicks should only attempt one 3-point shot per game.

If BAL appears in the Blocked Section of the X Column, assume all missed shots to be blocked.
