| Kansas City | 36.0 | 50.9 | Seattle | 52.4 | 47.5 |
| | | | League Average | 48.2 | 48.2 |

TO INSURE REALISM, passing cards for second string quarterbacks who threw less than 100 passes were adjusted according to their past records or reduced below the records achieved by their teams' first string quarterbacks. To further insure realism, certain substitute running backs' yards per carry average were reduced by their longest runs. We suggest that you throw few or no short or long passes to potential receivers who do not have any listing (completed pass caught) for that type of pass on their receiving cards.

With the purchase of the 56 additional players two extra players will be included free of charge. As no team name is indicated on their cards, you must write in the team name. Below is a list of the two involved players and the teams played for (last team mentioned is team of record at season's end). Please note that both players compiled their statistics while playing mostly with their first teams.

Dwayne Crutchfield N.Y. Jets — Houston
Archie Manning Houston — Minnesota

On defense linebackers must be blitzing in order to be credited with a sack. On offense blocking backs cannot run the ball unless playing in a two or three back offense. They must then play the fullback position.

In a 3-4 defense substitutes designated as linebacker may play both inside and outside linebacker.

In all two running back formations, the blocking back is the running back not carrying the ball or who is not the intended pass receiver. If the quarterback carries the ball the blocking back is the higher rated blocker.

In the three wide receiver, one running back formation all references to blocking back should be running back instead.

Due to the numerous injuries that occurred in the 1983 NFL Football season, to insure realism we suggest that you adhere closely to the number of rushing and passing attempts by each player.

Please note that for Dallas Gary Allen and Ron Fellows' punt return statistics were combined and the punting statistics were combined for Danny White and John Warren.

Please also note that extra point attempts and field goal attempts were combined for Mike Lansford and Chuck Nelson of the Rams and John Smith and Fred Steinfort of New England.

RULE REVISION

TWO TIGHT ENDS, TWO WIDE RECEIVERS, ONE RUNNING BACK — Replace one running back with a second tight end or blocking back. The opposing defensive right outside linebacker is responsible for covering the second tight end or blocking back. The remaining running back is designated as a fullback and is covered by the opposing defensive left outside linebacker. In addition the blocking back or second tight end's block ratings would be utilized for all readings of "offensive onside end" (left side) and blocking back (BB). If the blocking back or second tight end is the intended pass receiver and blocking back (BB) is the indicated pass blocker, an automatic sack occurs. **There is no keying on running backs in this offense.**

For those who want to switch from a 3-4 to a 4-3 defense or vice versa, please note the following rule addition: The switch in defense must be announced prior to the offensive coach's play selection. Play would continue as normal except that in a running situation all readings on the defensive card requiring defensive ratings would result in the higher yardage figure being allowed. For example a reading of DEF NT 0 or +5 would result in a 5 yard gain. In a pass rush situation please refer to the applicable chart found to the right.

| 3-4 DEF | 4-3 DEF |
