Below are listings indicating percentage of attempts a team rushed offensively (offensive rush percentage) and the percentage of attempts a team was rushed against defensively (defensive rush percentage).

	Offensive Rush %	Defensive Rush %		Offensive Rush %	Defensive Rush %
Buffalo	51.5	49.2	Los Angeles	57.6	47.5
Cincinnati	51.3	43.8	Miami	43.1	47.6
Cleveland	35.9	51.8	New England	40.1	58.1
Denver	44.6	47.1	New York	49.2	43.3
Houston	32.6	44.0	Pittsburgh	50.8	47.5
Indianapolis	38.3	49.6	San Diego	49.6	45.5
Kansas City	51.7	39.5	Seattle	48.4	43.5
			League Average	46.0	46.0

**RULE REVISION**

**TWO TIGHT ENDS, TWO WIDE RECEIVERS, ONE RUNNING BACK** - Replace one running back with a second tight end or blocking back. The opposing defensive right outside linebacker is responsible for covering the second tight end or blocking back. The remaining running back is designated as a fullback and is covered by the opposing defensive left outside linebacker. In addition the blocking back or second tight end's block ratings would be utilized for all readings of "offensive onside end" (left side) and blocking back (BB). If the blocking back or second tight end is the intended pass receiver and blocking back (BB) is the indicated pass blocker, an automatic sack occurs if there is an asterisk rated player on the defensive line of scrimmage. **There is no keying on running backs in this offense**, unless the defense is in a short yardage defense or the offense is within the opponents' 10 yard line. This rule revision supercedes the one found in the instruction booklet.

For those who want to switch from a 3-4 to a 4-3 defense or vice versa, please note the following rule addition: The switch in defense must be announced prior to the offensive coach's play selection and the defensive team must call a pass defense. Play would continue as normal except that in a running situation all readings on the defensive card requiring defensive ratings would result in the higher yardage figure being allowed. For example, a reading of DEF NT 0 or +5 would result in a 5 yard gain. In a pass situation, please refer to the applicable chart found to the right.

NFL DISCLAIMER: Please note that in a very few cases, names do not appear on the Strat-O-Matic Pro Football player cards, rating cards or roster sheet. This is due to the fact that these individuals have not authorized the NFL Players' Association to make available their names for board game use.

3-4 DEF	4-3 DEF
1. DLE	1. DLE
2. SECOND HIGH LB	2. DLT
3. DNT	3. DRT
4. HIGH LB	4. DRE
5. DRE	5. HIGH LB

Below are listings indicating percentage of attempts a team rushed offensively (offensive rush percentage) and the percentage of attempts a team was rushed against defensively (defensive rush percentage).

	Offensive		Defensive		
	Rush %	Rush %	Rush %	Rush %	
Atlanta	42.3	42.0	New Orleans	49.8	41.6
Chicago	53.8	42.2	New York	55.9	42.5
Dallas	43.1	48.8	Philadelphia	50.5	35.6
Detroit	42.1	49.3	Phoenix	48.4	54.3
Green Bay	36.7	48.4	San Francisco	42.3	38.4
Los Angeles	41.7	44.1	Tampa Bay	45.0	49.6
Minnesota	45.5	51.8	Washington	48.0	40.6

MISCELLANEOUS RULES

On defense linebackers must be blitzing in order to be credited with a sack. On offense blocking backs cannot run the ball unless playing in a two or three back offense. They must then play the fullback position.

In a 3-4 defense substitutes designated as linebacker may play both inside and outside linebacker.

In all two running back formations, the blocking back is the running back not carrying the ball or who is not the intended pass receiver. If the quarterback carries the ball the blocking back is the higher rated blocker.

In the three wide receiver, one running back formation all references to blocking back should be made to running back instead.

Due to the numerous injuries that occurred in the 1990 NFL Football season, to insure realism we suggest that you adhere closely to the number of rushing and passing attempts by each player.

On the specialist cards, to better reflect a team's ability, some teams have combined statistics for certain sections.

On the specialist card penalty section, please note that a star has been substituted for an asterisk on all readings of offsides and opponent offsides. Also on the elementary defense cards, please note that a star has been substituted for the delta on all sack readings. Also note that LG has been used instead of long gain on all receiver cards.

ABBREVIATIONS - LG = long gain TE = Tight End

Please note that since Detroit and Houston use four wide receiver offenses, the defense must bring in an extra defensive back to relieve the free safety of coverage responsibilities. Then follow rules for three wide receivers, one running back offense found in instruction book.

Brent Fullwood of Cleveland and Bob Perryman of New England have no team names on their cards. Fullwood began the season with Green Bay and was traded to Cleveland, while Perryman began with New England and was traded to Dallas. All statistics were derived from their first teams.
