NEW SHOOTOUT RULE

Roll two dice and refer to player's REB/BKwy column. If a "Goal," "Goal+" or "X-Reb" occurs, then the penalty shot results in a goal (if a split occurs then pick the split in the normal manner to determine if the shot is a goal). If a "Goalie rating" or "Goalie+ rating" occurs, then refer to the goalie's card in the normal manner to determine if the shot results in a goal. Any other reading results in a save by the goalie. IMPORTANT NOTE: For players that are primarily "defenseman" (their first position is listed as LD or RD), "Goal +" and "Goalie+ rating" cannot result in shootout goals - consider these to be shot wide. This note also applies to the penalty shot which is resolved in the same manner as a shootout shot.

10 ADDITIONAL GOALIES

P. Lalime (BUF), K. Poulin and N. Lawson (NYI), C. McElhinney and R. Lehner (OTT), J. Gustavsson (TOR), B. Holtby (WAS), R. Emery (ANA), C. Osgood (DET) and B. Bishop (SL) are the goalies included with the additional players.

Do not use these extra goalies in more games than they actually played. If the extra goalie is used, the top two goalies divide the remaining games according to their suggested starts percentage.

NOTE: For those who need help in creating forward lines, possible forward lines have been formulated for each team. Simply group players with the same numbers following their name to form a forward line shift. Players with a 4 next to their name can be used as either subs or part of a fourth line. Forward line shifts can be played in any order. Defensemen can be grouped as desired and played with any forward line shift. Forwards with (*) on their card may play the point (defense) on the power play once a game. Forwards with (**) may play the point (defense) whenever they are used on the power play.

MISCELLANEOUS RULES

For those who prefer to play with 4 different lines, the following adjustment must be made for timing of the period: Count off 8 cards from the top and place one of the forward line changes cards face up on top. Then count off 7 more cards and insert a forward / defensivemen line change card face up on the top of the deck. Count off 8 more action cards and place the other forward line change card face up on top, then place the remaining action cards on the deck. To create the forward / defensemen line change card, use a blank card from the Basic Action Deck or add the word forward to the presently used defensemen line change card.

For those who buy the additional players, a team may only "dress" 18 skaters plus 2 goalies.

When a shot occurs resulting in a shooting situation for "any player," YOU MUST select the player with the highest offense rating on the ice. If there is more than one player on the ice with the same rating, they must alternate throughout the game. This rule applies in all situations with the following exception: An "any player" reading that involves a rating. For example, in a rebound situation with the following reading "offense - any player with offense rating 3 or more," you may select ANY player on the ice who has an offense rating of 3 or more.

If a reading of "goalie rating +" occurs during even strength play, treat the situation as a shot on goal - save by the goalie - and a faceoff.

Some players have two positions listed on their cards. If when passing, they complete a pass to their own position, make the following appropriate substitution:

 LW to RW C to LW RW to C

Do not use a Goalie in more games than his suggested starts percentage found on the top of his card.

For Defensemen with an * next to their assist number - reduce their rating by one ONLY when they are participating on the Power Play Unit. In all other situations, do NOT reduce their assist number.

Penalties in the Basic and Advanced Games will not reflect total penalty minutes for players or teams. However, they accurately reflect Power Play opportunities.

In the Super-Advanced Power Play, total penalty minutes are measured accurately for all players except AA rated players. For AA rated players, use reading found on their defensive column whenever the number(s) appearing next to their name are drawn from the Advanced Action Deck resulting in a reading of "penalty," consider player to be assessed an additional 10-minute misconduct penalty. A 5-minute penalty is worth 8 additional Action Deck Cards. A 10-minute penalty is worth 15 additional Action Deck Cards. To account for additional elapsed penalty time, count 8 cards and 15 cards respectively from end of prior measured penalty.

For those who want to devise additional line shifts, 5 extra blank cards have been provided for such use and may be found with the Basic Action Deck.

A 5-minute overtime period is worth 8 Actions Deck Cards. Reshuffle the Action Deck and count 8 cards off the top.
